BEEF PRIMAL CUTS

BEEF CARCASS and PRIMAL CUT WEIGHT RANGES and YIELD GUIDE

The size of a primal cut depends mostly on the size of an animal. Therefore, compared with a smaller animal, a larger animal will generally produce larger primal cuts. Specifying the required weight range for a primal cut can reduce waste and ensure product integrity. However, this can add to the cost of the cut.

Use the Beef Carcasses and Primal Cut Weight Ranges and Yield Guide chart to find out what weights are available and order the primal that best suits your requirements.

PRIMAL								
CUT		Topside	Outside	Outside Flat	Eye Round	Thick Flank	Knuckle	D-Rump
H.A.M. No.		2000	2030	2050	2040	2060	2070	2100

This chart can be used to identify the average primal weight from various carcass weight ranges. This information is to be used as a GUIDE ONLY.

SIDE 1000

Carcass is split into Sides down the length dividing the spinal column. Carcass trim must comply with all government hygiene regulations that passes a carcass fit for human consumption and with the Australian meat industry agreed minimum trim requirements.

For further details of the minimum trim standard definition for beef carcass see page 110 or visit the AUS-MEAT web site.

Point requiring specification:

- Variations to minimum trim standard definition (buyer/seller agreed variation).

ITEM NO.
1000

HINDQUARTER 1010

Hindquarter is prepared from a Carcass Side by the separation of the Hindquarter and Forequarter by a cut along the specified rib, at right angles to the vertebral column through to the ventral portion of the Flank.

Points requiring specification:

- Rib number required.
- Diaphragm removed.

ITEM NO.

1010 (3-rib)	1015 (8-rib)
1011 (0-rib)	1016 (4-rib)
1012 (1-rib)	1017 (6-rib)
1013 (2-rib)	1018 (9-rib)
1014 (7-rib)	1019 (10-rib)

PISTOLA HINDQUARTER 1020

Pistola Hindquarter is prepared from a Hindquarter by the removal of the Thin Flank, lateral portion ribs and portion of the Navel End Brisket. A cut is made commencing at the superficial inguinal lymph node separating the M. rectus abdominis and following the contour of the hip, running parallel to the bodies of the vertebrae approximately 75mm from the eye muscle (M. longissimus dorsi) to the specified rib.

Points requiring specification:

- Rib number required.
- Diaphragm removed.
- Distance from eye muscle.

ITEM NO.

1020 (8-rib)	1025 (5-rib)
1021 (1-rib)	1026 (6-rib)
1022 (2-rib)	1027 (7-rib)
1023 (3-rib)	1028 (9-rib)
1024 (4-rib)	1029 (10-rib)

BUTT AND RUMP 1502

Butt and Rump is prepared from a Hindquarter with the removal of the Tenderloin in one piece from the ventral surface of the lumbar vertebrae and the lateral surface of the ilium. The Loin is removed by a cut at the junction of the lumbar and sacral vertebrae at a point cranial to the tuber coxae to the ventral portion of the Flank.

ITEM NO.
1502

ITEM NO.
1500

BUTT 1500

Option A

Butt is prepared from a Hindquarter by a cut commencing at the subiliac lymph node passing just cranial of the hip joint to the ischiatic lymph node.

Points requiring specification:

- Remove the superficial inguinal and subiliac lymph node.
- Removal of the portion of aitch bone and overlying fibrous tissue.

ITEM NO.
1503

BUTT 1503

Option B

The Butt is prepared from a Hindquarter by a straight cut at the cranial end beginning at the junction of the last sacral and first coccygeal vertebrae, exposing the ball of the femur without severing the protuberance. No more than two vertebrae shall remain on the Butt.

Points requiring specification:

- Remove the superficial inguinal and subiliac lymph node.
- Removal of the portion of aitch bone and overlying fibrous tissue.

ITEM NO.
1510

BUTT / SHANK - OFF 1510

Option C

Butt Shank Off is prepared from a Butt (item 1500) by the removal of the tibia (at the stifle joint), the tarsal bone (excluding the calcaneal tuber) and the extensor group of muscles along the seam, leaving the heel muscle (M. gastrocnemius), archilles tendon and flexor group of muscles in situ.

Point requiring specification:

- Remove the superficial inguinal and subiliac lymph node.

ITEM NO.
1520

BUTT SQUARE CUT 1520

Option D

Butt Square Cut is prepared from a Butt (item 1500) by a straight cut through the stifle joint, parallel to the base, removing the tibia, tarsal bones and surrounding meat.

RUMP AND LOIN 1540

Rump and Loin is prepared from a Hindquarter by a straight cut commencing at the subiliac lymph node passing just cranial of the hip joint to the ischiatic lymph node. The Thin Flank is removed at a point cranial to the tuber coxae and approximately 75mm from eye muscle (M. longissimus dorsi) and running parallel to the body of the vertebrae to the specified rib.

Points requiring specification:

- Rib number required.
- Distance from eye muscle.
- Diaphragm removed.

ITEM NO.

1539 (4-6R) 1542 (1-rib)
1540 (3-rib) 1543 (2-rib)
1541 (0-rib)

SHORT LOIN 1552

Short Loin is prepared from a Hindquarter by a straight cut at the junction of the lumbar and sacral vertebrae to a point cranial to the tuber coxae to the ventral portion of the Flank. The Thin Flank is removed at a point cranial to the tuber coxae and approximately 50mm to 75mm from eye muscle (M. longissimus dorsi) and running parallel to the body of the vertebrae to the specified rib.

Points requiring specification:

- Rib number required.
- Distance from eye muscle.
- Diaphragm retained.

ITEM NO.

1550 (3-rib)
1551 (0-rib)
1552 (1-rib)
1553 (2-rib)

FOREQUARTER 1063

Forequarter is prepared from a Carcase Side by the separation of the Forequarter and Hindquarter by a cut along the specified rib and at right angles to the vertebral column through to the ventral portion of the Flank.

Points requiring specification:

- Rib number required.
- Diaphragm retained.

ITEM NO.

1060 (10-rib) 1065 (5-rib)
1061 (11-rib) 1066 (7-rib)
1062 (12-rib) 1067 (9-rib)
1063 (13-rib) 1068 (8-rib)
1064 (6-rib)

BRISKET 1643

Brisket is prepared from a 13 rib Forequarter (item 1063) by a straight cut which commences at the junction of the 1st rib and 1st sternal segment to the reflection of the diaphragm at the 11th rib and continuing to the 13th rib.

Points requiring specification:

- Rib number required.
- Diaphragm removed.
- Specify parallel cutting line and Brisket removal point.

ITEM NO.

1640 (10-rib)
1641 (11-rib)
1642 (12-rib)
1643 (13-rib)

ITEM NO.
1671

PLATE RIBS 1671

Plate Ribs are the intercostal muscles and rib bones prepared from a bone in Brisket. Portions of the deckle may be retained as attachments to the bones.

Point requiring specification:

- Specify the minimum width, length and number of ribs.

ITEM NO.
1673

BRISKET RIB PLATE 1673

Brisket Rib Plate is prepared from a 13 rib Brisket (item 1643). The sternum and associated muscles are removed by a cut commencing at the 1st sternal segment cutting through the costal cartilage to and including the cartilage at the 7th rib removing the sternum and associated attached muscle. A cut is made following the ventral contour of the rib cartilage from the 7th rib to the 13th rib of the Forequarter removing the boneless ventral portion of the navel (M. transversus abdominis) and associated muscles. The Brisket Rib Plate can consist of the following optional rib numbers: (4th to 13th rib - 1st to 10th rib inclusive).

Points requiring Specification:

- Specify rib numbers and rib location.
- Length of rib from dorsal cutting line.
- Diaphragm removed.

ITEM NO.
1674

BRISKET POINT (STERNUM) 1674

The Brisket Point (sternum) and associated muscles is removed from a Brisket (item 1643) by a cut commencing at the 1st sternal segment cutting through and along the costal cartilage to and including the cartilage at the 7th rib. The sternum is removed with associated muscle attached. (Major muscles M. pectoralis superficialis, M. pectoralis profundus, M. rectus thoracis).

Point requiring Specification:

- Remove the M. transversus thoracis muscle.

ITEM NO.
2473

BRISKET NAVEL PLATE 2473

Brisket Navel End Plate is prepared from a Brisket (item 1643) by a cut following the ventral contour of the costal cartilage from the 7th rib to the 13th rib of the Forequarter removing the boneless ventral portion of the navel end. Major muscles are M. transversus abdominis and M. rectus abdominis. The white fibrous tissue on the ventral edge (linea alba) is removed.

Point requiring specification:

- Peritoneum removed.

CHUCK - SQUARE CUT 1617

Chuck Square Cut is prepared from a Forequarter after the removal of the Brisket and Ribs Prepared. Neck is removed from the Forequarter by a straight cut parallel and cranial to the 1st rib and through the junction of the 7th cervical and 1st thoracic vertebra. The Chuck Square Cut to consist of 4 to 6 ribs and the ventral cutting line is 75mm from the eye muscle (M. longissimus dorsi) and parallel to the vertebral column to the 1st rib. The fat deposit located at the dorsal edge is removed along with loose muscle tissue.

Points requiring specification:

- Rib number required.
- Distance from eye muscle.
- M. subscapularis muscle removed.
- Ligamentum nuchae removed.

ITEM NO.

1615 (5-rib)
1616 (4-rib)
1617 (6-rib)

NECK 1630

Neck is removed from the Forequarter by a straight cut parallel and cranial to the 1st rib and through the junction of the 7th cervical and 1st thoracic vertebra.

Point requiring specification:

- Ligamentum nuchae removed.

ITEM NO.

1630

RIBS - PREPARED 1601

Ribs Prepared is prepared from a Forequarter after the removal of the Brisket (item 1643) and Chuck Square Cut. Short Ribs portion is removed at a distance of 75mm from the M. longissimus dorsi at the loin (caudal) end, parallel with the vertebral column to the specified rib. The body of the vertebrae (chine) is removed exposing the lean meat but leaving the spinous processes (feather bones) attached.

Points requiring specification:

- Rib number required.
- Spinous processes removed.
- Tip of scapular and associated cartilage removed.
- Distance from eye muscle.
- Cap muscle removed (M. trapezius).
- Ligamentum nuchae removed.

ITEM NO.

1600 (5-rib) 1603 (8-rib)
1601 (6-rib) 1604 (9-rib)
1602 (7-rib) 1605 (4-rib)

SHORT RIBS 1694

Short Ribs are prepared from a Forequarter after the removal of the Brisket (item 1643)/Ribs Prepared/Chuck Square Cut. The cutting line is approximately 75mm from the eye of meat (M. longissimus dorsi) and parallel to the vertebral column. The M. cutaneus trunci is removed.

Points requiring Specification:

- Specify rib numbers and rib location.
- M. cutaneus trunci retained.
- M. latissimus dorsi muscle removed.
- Fat cover removed.
- Diaphragm removed.
- Specify sliced portion size requirements.

ITEM NO.

1686 (1-rib) 1691 (6-rib)
1687 (2-rib) 1692 (7-rib)
1688 (3-rib) 1693 (8-rib)
1689 (4-rib) 1694 (9-rib)
1690 (5-rib)

ITEM NO.
1631

CHUCK SHORT RIBS 1631

Chuck Short Ribs is derived from a Chuck and comprises of the ribs, intercostal muscles and the major portion of the M. serratus ventralis. The portion of the Short Ribs is determined by the required number of ribs as agreed between buyer and seller.

Points requiring specification:

- Rib number required.
- Variation of the dorsal and ventral cutting line as specified.

ITEM NO.
1695

SPARE RIBS 1695

Spare Ribs are prepared from a Forequarter and consist of rib bones and intercostal muscles. Spare Ribs can be derived from any portion of the rib cage.

Points requiring specification:

- Specify rib number and rib location.
- Specify size of rib portion.

ITEM NO.
1696

CHUCK RIB MEAT 1696

Chuck Rib Meat is prepared from a Chuck after the removal of the Brisket and Chuck Roll. The Chuck Rib Meat is wedge shaped retaining the ribs, intercostal muscles and the dorsal portion of the M. serratus ventralis.

Points requiring specification:

- Specify the ventral cutting line.
- Rib number required.

ITEM NO.
1697

BACK RIBS 1697

Back Ribs are prepared from the Ribs Prepared (item 1601) (Chine and feather bone removed) by fleecing (sheet boning) and removing the ribs in one piece.

Point requiring specification:

- Rib number required.

SHIN / SHANK FOREQUARTER 1682

SHIN / SHANK HINDQUARTER 1683

Shin-Shank is prepared from either Forequarter/Hindquarter legs (extensor/flexor group of muscles). The fore leg is removed by a cut following the Brisket removal line from the Forequarter through the M. triceps and M. biceps brachii and distal end to the humerus to include the radius/ulna and associated muscles. The Hindquarter leg is removed by a cut through the stifle joint removing the tibia/tarsal bones including the surrounding flexor/extensor muscle groups.

Points requiring specification:

- Forequarter or Hindquarter.
- Removal of Forequarter elbow (olecranon) and carpus joint at meat level.
- Removal of Hindquarter tarsus and stifle joints at meat level.

ITEM NO.

1682 FQ
1683 HQ

ARMBONE SHIN 1685

Armbone Shin is prepared from a Forequarter by the removal of the humerus bone with the M. biceps brachii attached. The ulna and radius are removed.

Point requiring specification:

- Removal of the humerus bone tuberosity.

ITEM NO.

1685

TOPSIDE 2000

Alternative description: INSIDE 2010

Topside is situated caudal and medial to the femur bone and attached to the os coxae (aitchbone), and removed by following the natural seam between the Thick Flank and Silverside. The pizzle butt, fibrous tissue and inguinal lymph node and surrounding fat are removed.

Points requiring specification:

- Erector muscle removed.
- Connective tissue removed.
- Femoral blood vessels removed.

ITEM NO.

2000
2010

TOPSIDE CAP OFF 2001

Alternative description: INSIDE CAP OFF 2011

Topside Cap Off is prepared from the Topside (item 2000) by the removal of the M. gracilis muscle along the natural seam. Fat deposits are removed.

Point requiring specification:

- Removal of the M. pectineus and/or M. sartorius muscles.

ITEM NO.

2001
2011

ITEM NO.
2002
2012

TOPSIDE CAP 2002

Alternative description: INSIDE CAP 2012

Topside Cap consists of the M. gracilis muscle removed from the Topside along the natural seam.

Point requiring specification:

- Removal of fibrous tissue and fat deposits.

ITEM NO.
2035

INSIDE MEAT 2035

Inside Meat is prepared from an Inside Cap Off with the removal of all the membrane, connective tissue and femoral blood vessels. The M. pectineus and M. sartorius muscles are removed along the natural seams.

*Alternative description: RED MEAT 2035

Specified combinations of Inside Meat (item: 2035) and Outside Meat (item: 2033) can be described alternatively as **RED MEAT** and apply either code identification.

ITEM NO.
2033

OUTSIDE MEAT 2033

Outside Meat is prepared from an Outside (item 2030) and by separating the Outside Flat (item 2050) and Eye Round (item 2040) along the natural seam. All sub-cutaneous/internal fat, connective tissue, membrane and silver skin on the Outside Flat and Eye Round are removed. The wedge shape muscle located on the caudal flat portion of the Outside Flat (M. glutobiceps) can be removed to allow fat deposits along the seam to be removed.

Point requiring specification:

- Wedge shape muscle or flat portion of the M. glutobiceps removed.

*Alternative description: RED MEAT (Refer Item 2035)

ITEM NO.
2020

SILVERSIDE 2020

Silverside is situated lateral/caudal to the femur bone and attached to the os coxae (aitchbone) and is removed by following the natural seam between the Thick Flank and Topside. The leg end of the primal is cut straight at the junction of the archilles tendon and heel muscle (M. gastrocnemius). The attached cartilage/gristle (thimble) from the aitch bone is removed.

Points requiring specification:

- Achilles tendon removed.
- Removal of the popliteal lymph node.

OUTSIDE 2030

Outside is prepared from the Silverside (item 2020) by the removal of the heel muscle (*M. gastrocnemius*). The popliteal lymph node, surrounding fat and connective tissue are removed.

Point requiring specification:

- Heavy connective tissue (silver skin) on ventral side removed.

ITEM NO.
2030

EYE ROUND 2040

The Eye Round is prepared from the Outside (item 2030) by following the natural seam between the Outside Flat (*M. gluteobiceps*) and the Eye Round (*M. semitendinosus*) separating the two muscles.

ITEM NO.
2040

OUTSIDE FLAT 2050

Outside Flat is prepared from an Outside (item 2030) by the removal of the Outside Flat along the natural seam between the Eye Round (*M. semitendinosus*) and the Outside Flat (*M. gluteobiceps*).

Point requiring specification:

- Heavy connective tissue (silver skin) on ventral side removed.

ITEM NO.
2050

THICK FLANK 2060

Thick Flank is removed along the natural seams between the Topside and Silverside. The patella, joint capsule and surrounding connective tissue are removed.

Points requiring specification:

- *M. cutaneus trunci* removed.
- Specify degree of exposure of ball tip muscles at Rump end.

ITEM NO.
2060

ITEM NO.
2070

KNUCKLE 2070

Knuckle is prepared from a Thick Flank (item 2060) by removing the cap muscle (M. tensor fasciae latae) and associated fat and subiliac lymph node.

Point requiring specification:

- Specify degree of exposure of ball tip muscles at Rump end.

MAJOR MUSCLES

ITEM NO.
2140 (3-rib) 2142 (1-rib)
2141 (0-rib) 2143 (2-rib)

STRIPLOIN 2140

Striploin is prepared from a Hindquarter by a cut at the lumbosacral junction to the ventral portion of the Flank. The Flank is removed at a specified distance from the eye muscle (M. longissimus dorsi) at both cranial and caudal ends.

Points requiring specification:

- Rib number required.
- Distance from eye muscle.
- Intercostals removed.
- Supraspinous ligament removed.
- M. multifidi dorsi muscle removed.

ITEM NO.
2150
2160

TENDERLOIN 2150

Tenderloin is prepared from the Hindquarter and is removed in one piece from the ventral surface of the lumbar vertebrae and the lateral surface of the ilium. The side strap muscle (M. psoas minor) remains attached.

Points requiring specification:

- Fat cover removed.
- Silver skin removed.
- M. iliacus (adjacent to side strap) removed.

TENDERLOIN SIDE STRAP OFF 2160

Tenderloin (item 2150) is further trimmed by the removal of the side strap (M. psoas minor).

ITEM NO.
2170

BUTT TENDERLOIN 2170

Butt Tenderloin is the portion of the Tenderloin remaining on the lateral surface of the ilium after the separation of the Short Loin.

Points requiring specification:

- Fat cover removed.
- Silver skin removed.
- M. iliacus (adjacent to side strap) removed.

SIRLOIN BUTT 2081

Sirloin Butt is prepared from a Hindquarter by a cut commencing at the subiliac lymph node to a point cranial to the acetabulum to the ischiatic lymph node and the ventral portion of the Flank.

The Loin (cranial end) is separated from the Hindquarter by a cut at the lumbosacral junction in a straight line cranial to the tuber coxae to the ventral portion of the Flank. The ventral portion of the tail (Flank) is removed by a cut medial to and removing the subiliac lymph node.

Point requiring specification:

- Heavy connective tissue removed.

ITEM NO.
2081

RUMP 2090

Rump is prepared from a Sirloin Butt (item 2081) by the removal of the abdominal muscles from the tail (flank) leaving the M.tensor fasciae latae in situ.

Points requiring specification:

- Heavy connective tissue removed.
- Specify length of (tail) (M. tensor fasciae latae) muscle retained.

To prepare a TOP SIRLOIN 2120 from a Rump 2090

the following trim applies: Remove the tail (Flank) by a cut at the junction of the M. gluteus medius and the M. tensor fasciae latae exposing approximately 25mm of the surface area of the M. gluteus medius.

ITEM NO.
2090

D-RUMP 2100

D-Rump is prepared from a Rump (item 2090) by the removal of the tail (Flank) by a cut following the natural seam between the M. tensor fasciae latae and the M. gluteus medius removing all of the tail from the lateral surface.

Point requiring specification:

- Heavy connective tissue removed.

ITEM NO.
2100

ROSTBIFF 2110

Rostbiff is prepared from a Rump (item 2090) by the removal of M. tensor fasciae latae, M. gluteobiceps and the M. sacrocaudalis along the natural seam. The periosteum and associated fats are removed.

Point requiring specification:

- Heavy connective tissue removed.

Alternative description: EYE of RUMP 2093

Eye of Rump is prepared from the Rostbiff and consists of the (M. gluteus medius) muscle only.

ITEM NO.
2110

ITEM NO.
2130

BOTTOM SIRLOIN 2130

Bottom Sirloin is prepared from the remaining portion of tail (Flank) from the Sirloin Butt (item 2081) after the removal of the Top Sirloin (item 2120).

ITEM NO.
2091

RUMP CAP 2091

Rump Cap is prepared from a Rump (item 2090) by removal of the cap muscle (M. gluteobiceps) along the natural seam.

Points requiring specification:

- Denuded of all external fat.
- Silver skin removed.

ITEM NO.
2131

TRI-TIP 2131 (BOTTOM SIRLOIN TRIANGLE)

Bottom Sirloin Triangle Tip (Tri-Tip) is the portion of the triangle shape muscle (M. tensor fasciae latae) separated from the Rump (item 2090) along the natural seam between the M. tensor fasciae latae and the M. gluteus medius muscles.

Points requiring specification:

- Denuded of all external fat.
- Connective tissue removed.

ITEM NO.
2200

THIN FLANK 2200

Thin Flank is prepared from a Hindquarter by a cut commencing at the superficial inguinal lymph node, bisecting the M. rectus abdominis and following the contour of the hip, and continuing to the specified rib and following the contour of the rib to the ventral edge. The connective tissue (linea alba) on the ventral edge is removed.

Points requiring specification:

- Removal of M. cutaneus trunci.
- Removal of gland and fat deposits under M. cutaneus trunci.
- Rib number required.

* **THIN FLANK MEAT 2201** – Thin Flank Meat is the remaining portion after the removal of the Flank Steak.

FLANK STEAK 2210

Flank Steak is prepared from a Thin Flank and is the flat lean fleshy portion of the M. rectus abdominis, and is further prepared by stripping the serous membrane and connective tissue from the muscle.

ITEM NO.
2210

INTERNAL FLANK PLATE 2203

Internal Flank Plate is prepared from the Thin Flank and is the thickest portion of the M. obliquus internus abdominis muscle. All visual fat is removed.

ITEM NO.
2203

EXTERNAL FLANK PLATE 2204

External Flank Plate is prepared from a Thin Flank by the removal of the M. obliquus externus abdominis. All covering fat and accessible internal pockets of fat are removed.

ITEM NO.
2204

INSIDE SKIRT 2205

Inside Skirt (M. transversus abdominis) is located on the inside of the abdominal wall of the Hindquarter and extends to the Naval End portion of the Brisket. The peritoneum and fat flakes are removed.

Points requiring specification:

- Hindquarter and/or Forequarter portion included.
- Membrane covering removed.

ITEM NO.
2205

ITEM NO.
2206

FLAP MEAT 2206

Flap Meat is prepared from the Internal Flank Plate (item 2203). The thin tapered ends of the muscle are trimmed.

ITEM NO.
2207

FLANK PLATE STEAK TIP 2207

Flank Plate Steak Tip is prepared from a Thin Flank (item 2200) and consists of the M. obliquus internus and M. obliquus externus abdominis which are removed from the Thin Flank in one piece. The thin tapered ends of the muscles are trimmed and the thick fleshy portion is retained. All covering fat and accessible internal pockets of fat are removed.

Point requiring specification:

- Silver tissue may be retained.

ITEM NO.
2190

THIN SKIRT 2190

Alternative description: OUTSIDE SKIRT

Thin Skirt is the costal muscle portion of the diaphragm. All white tendinous tissue not covering lean red muscle is removed.

Point requiring specification:

- Fat and membrane covering removed.

ITEM NO.
2180

THICK SKIRT 2180

Alternative description: HANGING TENDER

Thick Skirt is the lumbar portion of the diaphragm. All connective tissue, membrane and fat are removed.

Point requiring specification:

- Membrane removed.

RIB SET 2223

Rib Set is prepared from a Forequarter (item 1063) with the Brisket and Shin removed by a cut between the specified ribs following the contour of the rib to the Brisket removal line. The Rib Set is prepared by the removal of all bones, ligamentum nuchae, scapular and scapula cartilage.

Points requiring specification:

- Rib number required.
- Intercostals retained.
- M. cutaneous trunci removed.
- Ligamentum nuchae retained.

ITEM NO.

2220 (5-rib) 2223 (8-rib)
2221 (6-rib) 2224 (9-rib)
2222 (7-rib) 2225 (4-rib)

SPENCER ROLL 2233

The boneless Spencer Roll is prepared from a Ribset (item 2223). The Rib Ends are removed at a specified distance from the eye muscle (M. longissimus dorsi). Intercostal muscles are removed.

Points requiring specification:

- Specify: rib numbers and rib location.
- Distance from eye muscle.
- Ligamentum nuchae removed.

ITEM NO.

2230 (4-5R) 2233 (8-rib)
2231 (6-rib) 2234 (9-rib)
2232 (7-rib)

CUBE ROLL 2244

Alternative description: RIB EYE ROLL

Cube Roll is prepared from a Forequarter (item 1063) and consists of the M. longissimus dorsi and associated muscles underlying the dorsal aspect of the ribs (caudal edge of the 4th rib to the 13th rib inclusive).

Points requiring specification:

- Specify: rib number and rib location.
- Lip (M. iliocostalis) retained.

ITEM NO.

2240 (5-rib) 2243 (7-rib)
2241 (4-rib) 2244 (8-rib)
2242 (6-rib)

SHORT RIB MEAT 2465

Short Rib Meat is the thickest portion of the M. serratus ventralis covering the 5th to the 8th ribs and following the dorsal cutting line of the Brisket. Short Rib Meat can be prepared from any portion of the serratus muscle and cut to any specific size as agreed between buyer and seller. All visual fat is removed.

Points requiring specification:

- Silver skin removed.
- Specify the ventral and dorsal cutting line.
- Rib number required.

ITEM NO.

2465

ITEM NO.
2470

RIB CAP 2470

Rib Cap is prepared from the Rib Cover (M. trapezius) and a portion of the (M. latissimus dorsi) removed along the natural seam and is the lateral surface covering of the Cube Roll. Where specified all visual fat, membrane and associated tissue are removed from the meat surface.

Points requiring specification:

- Silver skin removed.
- Removal of the M. trapezius.

ITEM NO.
2640

CHUCK RIB MEAT 2640

Chuck Rib Meat is prepared from a Chuck (item 2260) and is the portion of the M. serratus ventralis muscle remaining over the ribs after removal of the Chuck Roll and is a wedge shape.

Point requiring specification:

- Rib number required.

ITEM NO.
2645

CHUCK MEAT SQUARE 2645

Chuck Meat Square is prepared from a Chuck (item 2260) and is a portion of rib meat (M. serratus ventralis and M. rectus thoracis) remaining after the removal of the Chuck Roll.

Points requiring specification:

- Rib number required.
- Distance from eye muscle (Chuck Roll).

ITEM NO.
2650 (4-rib)

RIB MEAT SQUARE 2650

Rib Meat Square is the caudal portion of rib covering from the 5th to the 8th rib and consists of a portion of the M. latissimus dorsi and M. serratus ventralis. The M. cutaneous trunci and external fat surface are removed.

Points requiring specification:

- Silver skin removed.
- Specify the M. latissimus dorsi and/or M. serratus ventralis muscles packed separately.

CHUCK AND BLADE 2250

Chuck and Blade is prepared from a Forequarter by the removal of the caudal portion of ribs and following the specified rib. The Brisket is removed along the cropping line. The Shin is removed along with all bones cartilage, tendons, ligamentum nuchae and lymph nodes.

Points requiring specification:

- Rib number required.
- Intercostals removed.
- Chuck Tender removed.

ITEM NO.
2250 (5-rib)
2251 (4-rib)
2252 (6-rib)

CHUCK 2260

Chuck is prepared from a Forequarter by the removal of the Rib Set (item 2223) at the specified rib number. The Brisket is removed along the cropping line. The Shin, Blade, Chuck Tender is removed along with all bones cartilage, tendons, ligamentum nuchae and lymph nodes.

Points requiring specification:

- Rib number required.
- Intercostals removed.
- Undercut (M. subscapularis) removed.

ITEM NO.
2260 (5-rib)
2261 (4-rib)
2262 (6-rib)

CHUCK - SQUARE CUT 2270

Chuck – Square Cut is prepared from the Chuck (item 2260) by the removal of the neck portion by a straight cut at right angles at the junctions of the 7th cervical and 1st thoracic vertebra.

Points requiring specification:

- Rib number required.
- Intercostals removed.
- Undercut (M. subscapularis) removed.

ITEM NO.
2270 (5-rib)
2271 (4-rib)
2272 (6-rib)

CHUCK ROLL 2275

Chuck Roll is prepared from a Chuck (item 2260) by the removal of the neck between the 5th and 6th cervical vertebra parallel to the caudal cutting line. The ventral cutting line is approximately 75mm from the eye muscle (M. longissimus dorsi) and parallel to the vertebral column to the 1st rib. The M. trapezius and the M. rhomboideus are removed and the undercut (M. subscapularis) remains firmly attached.

Points requiring specification:

- Rib number required.
- Cranial cutting line: - between the 6th and 7th cervical vertebra.
- between the 7th cervical and 1st thoracic vertebra.
- M. trapezius retained.
- Ligamentum nuchae removed.
- Undercut (M. subscapularis) removed.

ITEM NO.
2275 (5-rib)
2276 (4-rib)
2277 (6-rib)

ITEM NO.
2289

CHUCK ROLL - LONG CUT 2289

Chuck Roll - Long Cut is prepared from a Forequarter after the removal of the Brisket and Ribs Prepared. The ventral cutting line is approximately 75mm from the eye muscle (M. longissimus dorsi) and parallel to the vertebral column. The Neck is removed by a straight cut parallel to the caudal cutting line between the 3rd and 4th cervical vertebrae. The M. trapezius and the M. rhomboideus are removed and the undercut (M. subscapularis) remains firmly attached.

Points requiring specification:

- M. trapezius retained.
- Ligamentum nuchae removed.
- Undercut (M. subscapularis) removed.

ITEM NO.
2268 (5-rib)

CHUCK EYE ROLL 2268

Chuck Eye Roll is prepared from the Chuck Roll (item 2275) by removing a portion of the M. serratus ventralis at approximately 75mm from the ventral edge and cut parallel to the vertebral column.

ITEM NO.
2264

CHUCK EYE LOG 2264

Chuck Eye Log is prepared from a Chuck Eye Roll (item 2268) and is the remaining eye muscle mass after the removal of rib meat at the ventral edge of the eye meat and parallel to the chine edge.

The dorsal portion of the hump (M. rhomboideus) is removed by a straight cut parallel to the ventral edge.

ITEM NO.
2280

NECK 2280

Neck is prepared from a bone-in Neck (item 1630). Bones, cartilage, exposed tendons and ligamentum nuchae are removed.

Point requiring specification:

- Ligamentum nuchae retained.

CHUCK CREST 2278

The Chuck Crest is derived from a Forequarter and is the predominant portion of the M. rhomboideus muscle which is located on the dorsal edge of the Chuck and Neck.

Point requiring specification:

- Proportion of muscle retained.

ITEM NO.
2278

INTERCOSTALS 2430

Alternative description: RIB FINGERS

Intercostal muscles are derived from and in between the ribs of the Hindquarter and Forequarter. Specific primals can also be used to prepare Intercostals. Where a complete (or portion) of the intercostal muscle is packed, the specification must describe the method of identifying that portion as being incomplete i.e. portion, pieces, small etc.

Point requiring specification:

- Specify minimum length of muscle.

ITEM NO.
2430

BRISKET 2323

Brisket is prepared from a 13 rib Forequarter (item 1063) by a straight cut which commences at the junction of the 1st rib and 1st sternal segment to the reflection of the diaphragm at the 11th rib and continuing to the 13th rib. All bones and cartilage are removed. The fatty tissue medial to the pectoral muscles is removed. The white fibrous tissue on the ventral edge (linea alba) is removed.

Points requiring specification:

- Rib number required.
- Intercostals removed.
- Diaphragm removed.
- Peritoneum removed.
- Inside Skirt (M. transversus abdominis) removed.

ITEM NO.

2320 (10-rib) 2322 (12-rib)
2321 (11-rib) 2323 (13-rib)

BRISKET POINT END 2332

Brisket Point End is prepared from a Brisket (item 2323) by the removal of the Navel End and following the caudal edge of the specified rib.

Points requiring specification:

- Rib number required.
- Intercostals removed.

ITEM NO.

2330 (5-rib) 2332 (6-rib)
2331 (4-rib) 2333 (7-rib)

**ITEM NO.**

2340 (5-rib) 2343 (7-rib)
2341 (4-rib) 2344 (8-rib)
2342 (6-rib) 2345 (9-rib)

BRISKET NAVEL END 2342

Brisket Navel End is prepared from a Brisket (item 2323) by the removal of the Point End and following the caudal edge of the specified rib.

Points requiring specification:

- Rib number required.
- Intercostals removed.

**ITEM NO.**

2346 (5-rib) 2348 (7-rib)
2347 (6-rib) 2349 (8-rib)

SHORT PLATE 2346

Short Plate is prepared from a Forequarter and comprises Rib Ends and Brisket Navel End in one piece. Short Plate can be prepared to 5 or 8 ribs and the dorsal cutting line can vary or as agreed between buyer and seller. All bones and costal cartilage are removed.

Points requiring specification:

- Intercostals retained.
- Diaphragm removed.
- Rib number required.
- Variation to cutting line.
- Red bark (M. cutaneus trunci) removed.
- Denuded of all external fat.

**ITEM NO.**

2350 (5-rib) 2352 (6-rib)
2351 (4-rib) 2353 (7-rib)

BRISKET POINT END - DECKLE OFF 2353

Brisket Point End Deckle Off is prepared from a Brisket (item 2323) by the removal of the Navel End portion following the caudal edge of the specified rib. The Deckle is removed from the Point End along the natural seam together with associated fat and intercostals. The fatty tissue located between the pectoral muscles is completely removed.

Points requiring specification:

- Rib number and rib location.
- M. cutaneus trunci removed.

**ITEM NO.**

2326

BRISKET PIECES - DECKLE 2326

Brisket Pieces are prepared from a Brisket Point End and/or Navel End after removal of the Deckle (M. serratus ventralis). Brisket Pieces can comprise any or all of the muscles that comprise the Brisket.

The required pieces/portions are trimmed as specified between the buyer and seller.

Points requiring specification:

- Specify deckle portion by the number of ribs.
- Muscle content.
- Intercostals removed.

BRISKET POINT END PLATE 2327

Point End Plate is the M. pectoralis superficialis muscle and is prepared from a Brisket Point End Deckle Off (item 2353) by separating the M. pectoralis profundus and the M. pectoralis superficialis.

Points requiring specification:

- Rib number required.
- Denuded of all external fat.

ITEM NO.
2327

BRISKET POINT END - PECTORAL 2328

Pectoral is the M. pectoralis profundus muscle and is prepared from a Point End Deckle Off (item 2353) by separating the M. pectoralis profundus and the M. pectoralis superficialis.

Points requiring specification:

- Rib number required.
- Denuded of all external fat.

ITEM NO.
2328

CHUCK TENDER 2310

Chuck Tender is a conical shape muscle lying lateral to the blade bone on the cranial side of the blade ridge and is removed from the Forequarter following the natural seam.

Point requiring specification:

- Connective tissue removed.

ITEM NO.
2310

BLADE 2300

Alternative description: CLOD

Blade is prepared from a Forequarter by following the natural seam between the ribs and the scapular (M. latissimus dorsi) and overlying muscle (M. trapezius) and the underlying muscle (M. serratus ventralis). The Blade lies caudal to the humerus and below the spine of the scapula and comprises of a large portion of the triceps group of muscles.

Points requiring specification:

- Specify length of tail from tip of scapular cartilage.
- Undercut (M. subscapularis) attached.
- Tendons at shoulder joint end removed.

ITEM NO.
2300

ITEM NO.
2302

BOLAR BLADE 2302

Bolar Blade is prepared from the Blade (item 2300) by the removal of the M. infraspinatus and M. trapezius lying caudal to the humerus, the Bolar Blade includes a large portion of the triceps group of muscles.

Points requiring specification:

- M. cutaneus trunci removed.
- M. latissimus dorsi removed.

ITEM NO.
2303

OYSTER BLADE 2303

Oyster Blade is prepared from a Blade (item 2300) by the removal of the Bolar Blade (triceps group) along the natural seam from the M. infraspinatus.

Points requiring specification:

- M. trapezius removed.
- Periosteum removed.

ITEM NO.
2304

BLADE UNDERCUT 2304

Blade Undercut is prepared by removing the M. subscapularis from the medial surface of the scapular bone. The muscle consists of 3 parts and is trimmed to the required specification.

Point requiring specification:

- Prepared to specific size requirements.

ITEM NO.
2360

SHIN/SHANK 2360 FOREQUARTER/HINDQUARTER

Shin/Shank is prepared from the muscles of the fore and hind legs, namely the extensor and flexor group of muscles. In addition, the Shin/Shank pack can include the Heel Muscle (M. gastrocnemius).

Points requiring specification:

- Connective tissue and skin removed.
- Fore or Hind.
- Sinews/tendons removed.
- Specific muscle content i.e. Heel muscle (only).

SHIN – SPECIAL TRIM 2365

Shin-Special Trim is derived from Shin/Shank (item 2360) and is prepared into individual muscles or specified muscle groups.

The maximum tendon length on all muscles is 15mm, which may be measured from either end of the muscle. Muscle grouping is identified in the following manner:

Group A - Hindquarter Extensor Group.

Group B - Heel Muscle.

Group C - Conical Muscle (M.biceps brachii)

Group D - Hindquarter Flexor Group.

Group E - Forequarter Extensor Group.

Group F - Forequarter Flexor Group.

Points requiring specification:

- Skin and connective tissue removed.
- Specify Muscle Group listed as Group A to F.

ITEM NO.
2365

NECK CHAIN 2460

Neck chain (M. longus colli) muscle is the thin muscle prepared from the Forequarter by removing from the ventral aspect of the cervical and thoracic vertebrae up to the 6th rib in one piece.

ITEM NO.
2460

COMBINATION PACKS

HINDQUARTER CUTS MIXED 2410

Hindquarter Cuts Mixed is a combination pack containing at least 2 or more primal cuts that have been removed from the Hindquarter. The individual preparation requirements of each specific primal will be included in the specification details between buyer and seller.

Points requiring specification:

- Number of ribs on the Hindquarter.
- Specify primal and specification details.

ITEM NO.

2410 (3-rib)
2411 (0-rib)
2412 (1-rib)
2413 (2-rib)

FOREQUARTER CUTS MIXED 2420

Forequarter Cuts Mixed is a combination pack containing at least 2 or more primal cuts that have been removed from the Forequarter. The individual preparation requirements of each specific primal will be included in the specification details between buyer and seller.

Points requiring specification:

- Number of ribs on the Forequarter.
- Specify primal and specification details.

ITEM NO.

2420 (10-rib)
2421 (11-rib)
2422 (12-rib)
2423 (13-rib)

FORE CUTS AND HIND CUTS 2450

Forequarter Cuts and Hindquarter Cuts are a combination pack containing at least 2 or more primal cuts that have been removed from the Hindquarter and Forequarter. The individual preparation requirements of each specific primal will be included in the specification details between buyer and seller.

The pack must contain at least 1 primal cut from both quarters (Fore and Hind).

Points requiring specification:

- Number of ribs on the Forequarter.
- Specify primal and specification details.

ITEM NO.

2450

BUTT SET 2483

Butt Set is a combination pack containing primal cuts prepared from a Rump and Butt packed in any combination; Topside, Silverside, Thick Flank (Knuckle) and Rump.

The individual preparation requirements of each specific primal will be included in the specification details between buyer and seller.

ITEM NO.

2483

FOREQUARTER SET 2484

Forequarter Set is a combination pack containing the primal cuts prepared from the Forequarter, Chuck Roll, Blade, Point End Brisket, Navel End Brisket, Chuck Tender, Short Rib, Chuck Rib and packed in any combination.

The individual preparation requirements of each specific primal will be included in the specification details between buyer and seller.

Point requiring specification:

- Brisket and Shin removed.

ITEM NO.

2484

BONELESS BEEF MANUFACTURING BULK PACKS DEFINITION

Manufacturing Bulk packs are generally made up of the following combinations:

- Primal cuts or portions of primal cuts.
- Residual trimming from primal cut preparation.
- Boneless Forequarter or Hindquarter.
- Grinding beef.

Manufacturing packs are generally prepared to a specified lean content, assessed visually or tested chemically and expressed as a percentage of lean meat of the pack (CL). Lean assessment by chemical testing of bulk pack manufacturing meat for export is a standard industry requirement.

60CL

80CL

90CL

Meat images shown are examples of fat/lean only.

HINDQUARTER

2521 (3-rib) - 2522 (0-rib) - 2523 (1-rib) - 2524 (2-rib)

Hindquarter packs consist of specified primal cuts and assorted trimming pieces. Hindquarter packs do not have to contain any of the primal cuts listed in Group A.

Points requiring specification:

- Primal cuts included.
- Inclusion of Thin Flank/Thin Flank Meat.
- Diaphragm removed.
- Intercostals removed.
- Specify any Forequarter meat included.

GROUP A

Tenderloin, Shank, Flank Steak.

HINDQUARTER MEAT

2530 (3-rib) - 2531 (0-rib) - 2532 (1-rib) - 2533 (2-rib)

Hindquarter Meat packs consist of specified primal cuts and associated trim pieces. The pack does not have to contain any of the primal cuts listed in Group A, but contain at least two primal cuts as listed in Group B.

Points requiring specification:

- Primal cuts included.
- Inclusion of Thin Flank/Thin Flank Meat.
- Diaphragm removed.
- Intercostals removed.
- Specify any Forequarter meats included.

GROUP A

Tenderloin, Shank, Flank Steak.

GROUP B

Topside, Silverside, Thick Flank (Knuckle), Rump, Striploin.

FOREQUARTER

2601 (10-rib) - 2602 (11-rib) - 2603 (12-rib) - 2604 (13-rib)

Forequarter packs consist of primal cuts and associated trim pieces. Forequarter packs do not have to contain any of the primal cuts listed in Group A.

Points requiring specification:

- Primal cut included.
- Inclusion of Thin Flank/Thin Flank Meat.
- Diaphragm removed.
- Intercostals removed.
- Brisket meat included.
- Specify any Hindquarter meats included.

GROUP A

Cube Roll, Chuck Tender, Shin/Shank.

FOREQUARTER MEAT

2610 (10-rib) - 2611 (11-rib) - 2612 (12-rib) - 2613 (13-rib)

Forequarter Meat packs consists of primal cuts and associated trim pieces. Forequarter meat packs do not have to contain any of the primals listed in Group A, but must contain at least two primals listed in Group B.

Points requiring specification:

- Primal cuts included.
- Inclusion of Thin Flank/Thin Flank Meat.
- Diaphragm removed.
- Intercostals removed.
- Brisket meat included.
- Specify any Hindquarter meats included.

GROUP A

Cube Roll, Chuck Tender, Shin/Shank.

GROUP B

Chuck, Neck, Blade.

FORE AND HIND 2590

Forequarter and Hindquarter packs consist of specified primal cuts and associated trim pieces. Fore and Hind packs do not have to contain any of the primals listed in Group A, but must contain at least two primal cuts listed in Group B, and at least two primal cuts listed in Group C.

Point requiring specification:

- Trims and any identifiable pieces are to be excluded.

GROUP A

Cube Roll, Chuck Tender, Shin/Shank, Tenderloin, Flank Steak.

GROUP B.

Chuck, Neck, Blade.

GROUP C

Topside, Silverside, Thick Flank (Knuckle), Rump, Striploin.

FORE AND HIND MEAT 2620

Forequarter and Hindquarter Meat packs consist of specified primal cuts and associated trim pieces. Fore and Hind Meat packs do not have to contain any of the primals listed in Group A, but must contain at least two

primal cuts listed in Group B, and at least two primal cuts listed in Group C.

Points requiring specification:

- Primal cuts included.
- Inclusion of Thin Flank/Thin Flank Meat.
- Diaphragm removed.
- Intercostals removed.

GROUP A

Rib Eye Roll, Chuck Tender, Shin/Shank, Tenderloin, Flank Steak.

GROUP B

Topside, Silverside, Thick Flank (Knuckle), Rump, Striploin.

GROUP C.

Chuck, Neck, Blade.

CHUCK MEAT 2630

Chuck Meat is the portion(s) of Chuck remaining after the removal of any of the Chuck primal cuts in Group A.

Points requiring specification:

- Intercostals removed.
- Specify variation of chuck piece requirement.

GROUP A

Chuck Roll, Chuck Roll Long, Chuck Eye Roll, Chuck Eye Log.

TRIMMINGS 2560

Trimming are portions of meat remaining after the preparation of primal cuts from carcass, side, quarter or portion of a carcass. Trimming packs must not include any portion of head meat, internal organs, major tendons or ligaments. Items classed as Fancy Meats (Offal), major tendons or ligaments must not be included.

Trimming - Code 2561: When a minimum size trim pieces as agreed between buyer and seller.

TRIMMINGS FAT 2565

Trimming – Fat are defined as those portion of beef (fat trim) remaining after the preparation of primal cuts and shall not include any head meat, internal organs, major tendons or ligaments. The residual fat and meat portions may be included provided these are removed from primal cuts due to trim of excessive external fat or where a primal has been denuded. These packs must have a chemical lean content of 40 chemical lean (cl) or LESS and the predominant component must be fat (adipose tissue).
